Nýtt innan vísindi 2005

The following scientists have defended a PhD Thesis in 2005:

Petur Weihe Dalsgaard

Isolation and structure elucidation of natural products from psychotolerant Penicillia

Ph.D.-thesis at the University of Copenhagen

Jóanes P. Hofgaard

Characterization og the cytoprotective effect of 6-aminonicotinanide against oxidative stress in cardiac cells!

Ph.D.-thesis at the University of Copenhagen.

Britta Fängström

Human exposure to organohalogen compounds in the Faroe Islands

Ph.D.-thesis at the University of Stockholm

Anna Maria Svabo Jørgensen

Vinna og leiðsla - professionalisering innan heilsuverkið

Ph.D.-thesis at University of South Australia

Gudrun Gaard

Far fram um torg.

Ph.D.-thesis at the University of the Faroe Islands

Jens Mortansson J. Nolsøe

Syntetic Studies Towards Decahydroquinoline Alkaloids Utilising Small Rings as Synthons

Ph.D.-thesis at the Technical University of Copenhagen

Poul F. Guttesen

A thesis exploring the place and function of the Kingdom of God in the theology of Jürgen Moltmann and in the Book of Revelation

Ph.D.-thesis at the St. Andrews University, Scotland

Scientific publications about the Faroe Islands, 2005

Vísindaritverk 2005

This list for 2005 is compiled to show the scientific work going on within and outwith the institutions in the Faroe Islands. It should in this way be easier for the readers of *Fróðskaparrit* to have an idea of the different Faroese projects the scientists are working on and make it easier to acquire papers and books. The list also includes papers and books made by scientists outside the Faroese institutions, and whenever possible, the editorial office of *Fróðskaparrit* can provide contact addresses of the author(s). Moreover, this list also includes some papers missed out in previous numbers of *Fróðskaparrit*.
