Nýtt innan vísindi 2007

The following scientists have defended a PhD Thesis in 2007

Bárður A. Niclasen

Aldumodel fyri leiðirnar kring Føroyar

PhD, Fróðskaparsetur Føroya, University of the Faroe Islands

Bárður Árantsson

The Grid Block Device. Simple and Flexible Fault Tolerant Distributed Storage

PhD, Syddansk Universitet, Denmark

Benjamin Pedersen

Auditory temporal resolution and integration - stages of analyzing time-varying sounds

PhD, University of Aalborg, Denmark

Dánjal Jákup Jacobsen

Hemdynamic modelling of BOLD fMRI – A machine learning approach

PhD, Danmarks Tekniske Universitet

Eli Jens Høgnesen

EOR in fractured, oil-wet chalk - Spontaneous imbibition of water by wettability alteration

PhD University of Stavanger, Norway

Erika Hayfield

Children's cultures of consumption: An ethnography

PhD, Napier University, Edinburgh, Scotland

Firouz Gaini

Ungdómur. Miðlar, mentan & seinmodernitetur í Føroyum

PhD, Fróðskaparsetur Føroya, University of the Faroe Islands

Hans Atli Dahl

A search for susceptibility loci for panic disorder in the isolated faroese population

PhD, Odense Universyhospital, Denmark

Helga Mikkelsen

Influence of Growth Mode and Aminoglycoside Antibiotics on Pseudomonas aeruginosa Physiology

PhD, University of Cambridge, England

Hilmar Kjartansson Danielsen

Z-phase in 9-12%Cr Steels

PhD, Danmarks Tekniske Universitet

Høgni Hammershaimb Debes

Phytoplankton and zooplankton interactions on the Faroe Shelf

PhD Fróðskaparsetur Føroya, University of the Faroe Islands

Juanna Schrøter Joensen

Determinants and consequences of human capital investments

PhD University of Aarhus, Denmark

Ólavur Christiansen

Opportunizing: How companies create, identify, seize and exploit situations to sustain their survival or growth. An orthodox grounded theory approach.

PhD University of Aalborg, Denmark

Scientific publications about the Faroe Islands, 2007

Vísindaritverk 2007

This list for 2007 is compiled to show the scientific work going on within and outwith the institutions in the Faroe Islands. It should in this way be easier for the readers of *Fróðskaparrit* to have an idea of the different Faroese projects the scientists are working on and make it easier to acquire papers and books. The list also includes papers and books made by scientists outside the Faroese institutions, and whenever possible, the editorial office of *Fróðskaparrit* can provide contact addresses of the author(s). Moreover, this list also includes some papers missed out in previous numbers of *Fróðskaparrit*.

Fróðskaparrit is the journal of the Fróðskapur – Faroe University Press. Papers from all areas of natural and medical sciences, and the humanities are invited in any language as long their topics pertain to the Faroes.

All manuscripts received will be evaluated by the board of editors and/or independent referees. This style guide **must** be followed or else the paper will be returned to the author for revision.

Submit the manuscript to the Editor-in-Chief as a paper copy or by email to: doreteb@ngs.fo including a CD in Winword if the manuscript contains several pictures and/or tables.

Authors will receive page in pdf-format for correction and the corrected proofs should be returned within **72 hours** to the Editor-in-Chief. Alteration should be kept to a minimum, and extensive changes will be charged for. You will be sent a pdf of the paper, which you are free to place on your website or distribute as you wish. The pdf will be locked and its content cannot be changed or revised.

Style Guide

Manuscripts should follow the general rules accepted within the respective scientific field. However, endnotes should be kept to a minimum and especially footnotes should be avoided – the full explanation be given in the text.

Italics (which can also be indicated in the text by underlining) should be used for:

- 1) References to titles of books and periodicals
- 2) Latin names of plants and animals

The title of the paper in **bold, Upper-and-lower case** and the author/s name in *Italic, UPPER and lower case* followed by two line spaces.

Level 1 subtitle: **Bold, Upper-and-lower case** followed by one line space.

Level 2 subtitle: **Bold, Upper-and-lower case** followed by no space.

Level 3 subtitle: *Italics, UPPER and lower case* followed by no space.

The title, author's name with postal and Email should be on the first page, followed by an abstract of the paper, not exceeding 175 words amplifying but not repeating the title. It should outline the purpose of the paper, the work, details and important results and conclusions. An extra summary should be provided to be translated into Faroese or English depending on the language of the paper.

The text should ideally contain: Introduction, Materials and Methods, Results, Discussion and Conclusion, but

other concepts may be accepted. In the text the International Systems of Units are followed (SI-Units, e.g. meter as m; degree C as °C). Figures: Tables and Figures (including photographs) should be listed after the text, and they should be explained in the caption (not as: ..see text). In Tables the tabulator **must** be used, **never** spaces. Figures must be submitted in EPS, TIFF or JPEG file format or printed on white paper. Photographs in black and white or colour plates must be supplied as dias or glossy prints, not larger than A4 in size or sent by email.

In the text, references should not be cited by numbering, but as Joensen (1963), or when more convenient (Joensen, 1963). More than one reference should be written as Joensen (1963; 1970) or (Joensen, 1963; 1970) or (Svabo, 1783; Joensen, 1963). References to specific pages should be given as (Joensen, 1963: 123-134). Two authors should be referred as (Joensen and Tåning, 1970) and more than two authors as (Enckell *et al.*, 1986). See below for references written in full. The list of references should not be numbered but placed in alphabetical order, the titles of books given in full, and journals with the abbreviations used by the actual journal, as follows:

Benjaminsen, T. and Christensen, I. 1980. The natural history of the bottlenose whale, *Hyperoodon ampullatus* (Foster) *In: Winn, H.E. and Olla, B.L. (eds). Behavior of Marine Animals* 3: 143-158.

Fróðskaparrit er tiðarrit hjá Fróðskapi – *Froe University Press*. Allar náttúruvíśindaligar og læknarfroðiligar ritgerðir, umframt allar hugvíśindaligar ritgerðir, á öllum málum, hava okkara áhuga, um evnið, tær viðgera, hefur samband við Føroyar.

Ritsjórnin og/ella óheftir metrar viðgera öll handritini sum koma inn. Ein **avgjørd treyt** er, at henda høvundaleiðbeining verður fylgd nágreniliga, annars verður handritið sent høvundanum aftur, so at hann kann endurskoða tað.

Send handritið til ritstjóran í prentaðum líki og/ella við telduposti: doreteb@ngs.fo.

Høvundarnir fáa rættlestrar sendandi, og teir skulu sendast ritstjóranum aftur innan **72 timer**. Sum minst eיגur at verða broytt; eru umfatandi broytingar, verður eyka gjald kravt fyrir tað.

Høvundarnir fáa grein sína sendandi sum pdf-skjal í somu uppsetting sum í prentaðu útgávuni. Pdf-skjalið kann leggjast út á heimasiðu ella býtast út eftir ynski. Pdf-filan er læst og möguleikar eru ikki at rætta ella broyta í skjalnum.

Leiðbeining

Handrit eiga at lúka tær treytir, sum eru vanligar innan tey ymisku víśindaligu økini. Kortini má so lítið sum gjørligt vera af ískoytisviðmerkingum. Serliga eiger at verða roynt at sleppa undan undirgreinum. Ístaðin eiger öll frágreiðingin at koma í sjálva greinina.

Skákstavir (kann eisini verða víst á í tekstinum við at vera undirstríkað) eiga at verða nýttir til:

- 1) At vísa til heiti á bókum og tiðarritum
- 2) Plantu- og djóraheiti á latini

Heitið á ritgerðini: **Feitir stavir, Stórir-og-smáir stavir** og navnið á høvundanum/høvundunum: Skákstavir, Stórir-og-smáir stavir og so tvær tómar reglur.

Stig 1 undirheitið: **Feitir stavir, Stórir-og-smáir stavir** og so ein tóm regla.

Stig 2 undirheitið: **Feitir starvir, Stórir-og-smáir stavir**, eingin tóm regla aftaná.

Stig 3 undirheitið: **Skákskrift, Stórir-og-smáir stavir**, eingin tóm regla aftaná.

Heitið og navnið á høvundanum eiga at standa á fyrstu síðu saman við fullum navni og bústaði høvundans saman við teldupostadressu. Harnæst kemur úrtak av greinini, ið ikki má vera meira enn 175 orð, ið viðkar um heitið á greinini, uttan at endurtaka tað. Úrtakið vísir í stórum á endamálið við greinini, greiðir frá arbeidinum, staklутum og týdingarmiklum úrslitum og niðurstøðum. Umframt eiger enn ein samandráttur at vera tókur til at týða annaðhvort til føroyskt ella enskt, alt eftir, hvørjum mál, ritgerðin er á.

Best er um tekstinur verður býttur upp í: Inngang, tilfar og mannagongd, úrslit, kjak og niðurstøðu, men onnur hugtök munnu fara at verða góðikin. Í tekstinum verða altjóða skipanir og eindið nýttar (SI-Units, sum til dømis metur skrivaður m; Celsius-stig skrivað °C). Myndir: Talvur og myndir (eisini fotomyndir) eiga at standa aftan á tekstinum, og frágreiðing um tær eiger at standa í myndatekstinum (ikki sum: ...sí tekst). Í talvunum eiger teigari (tabulator) at verða nýttur, ongantíð glopp. Myndir eiga at verða sendar í EPS-, TIFF- ella JPEG-formati, ella sum prent (fotomyndir – pappír ella diapositiv – ella sum útprent-aðir grafar/myndir).

Í tekstinum eiga tilvísingar ikki at vera talmerktar, men navngivnar sum Joensen (1963), ella, tá ið tað liggur betur fyri, sum (Joensen, 1963). Er meiri enn ein tilvísing, eiger at verða skrivað soleiðis: Joensen (1963; 1970), ella: (Svabo, 1783; Joensen, 1963). Soleiðis eiger at verða víst til ávisar síður: (Joensen, 1963: 123-134). Soleiðis eiger at verða víst til tveir høvundar: (Joensen og Tåning, 1970) og soleiðis til fleiri enn tveir høvundar: (Enckell et al., 1986). Longri niðri stendur tilvísing í fullum orðaljóði. Tilvísingarlistin eiger ikki at verða settur í nummarrøð, men skrivaður í bókstavarøð, heitið á bókum í fullum líki, tiðarrit við teimum styttingum, sum tiðarritið nýtir í lötuni, so sum:

Benjaminsen, T. and Christensen, I. 1980. The natural history of the bottlenose whale, *Hyperoodon ampullatus* (Foster) In: Winn, H.E. and Olla, B.L. (eds). *Behavior of Marine Animals* 3: 143-158.
